

**Incident Management Situation Report
Friday, March 31, 2023 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (March 24, 2023 – March 30, 2023):

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (452 fires)
New large incidents:	18
Large fires contained:	15
Uncontained large fires: **	6
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there is 1 fire being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Southern Area (PL 1)

Fire Activity and Teams Assigned	Total
New fires:	373
New large incidents:	17
Uncontained large fires:	6

* **Keeler**, Osage Agency, BIA. Four miles southwest of Burbank, OK. Brush. Extreme fire behavior with running, torching and spotting.

* **Double Gate**, Florida Forest Service. Ten miles west of Daytona Beach, FL. Timber and brush. Active fire behavior with backing, running and flanking. Area and trail closures in effect.

* **Blackoak**, Wewoka Agency, BIA. Five miles southwest of Wewoka, OK. Hardwood litter and tall grass. Active fire behavior with running and creeping.

* **Last Resort**, North Carolina Forest Service. Nine miles south of Creswell, NC. Southern rough. Moderate fire behavior with smoldering.

* **Boar Creek**, Osage Agency, BIA. Seven miles east of Hominy, OK. Brush. Minimal fire behavior with smoldering and creeping. Structures threatened.

* **Jones Island Club Road**, North Carolina Forest Service. Started on private land two miles southwest of Hobuken, NC. Southern rough. Minimal fire behavior with smoldering.

Acres (2013 – 2022 as of today)	486,968

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Widespread elevated to critical fire weather conditions due to strong winds and low relative humidity will develop today on much of the southern and central Plains into the Ozarks and Lower Missouri Valley. Dry and windy weather will continue through the weekend on the southern High Plains and portions of the Southwest before expanding across much of the southern and central Plains Monday and Tuesday, with elevated to extremely critical fire weather conditions and moderate to high-risk significant fire potential expected in these areas. Moderate and potentially high-risk significant fire potential is likely tomorrow in Virginia and North Carolina due to strong winds and low relative humidity, but it is conditional on thunderstorms and showers dissipating over the region today into tomorrow morning. Dry post-frontal conditions are expected from central and east Texas into portions of the Lower Mississippi Valley and Deep South tomorrow and along and east of the Appalachians Sunday. Little to no rain and periodic low afternoon relative humidity are forecast for Florida.

Widespread severe weather is expected from the Midwest through the Mississippi, Lower Missouri, Ohio, and Tennessee Valleys through tonight. Heavy rain will accompany some of these storms, with heavy rain and snow across portions of the Great Lakes as well. Another round of precipitation, mostly snow, is expected for northern half to two-thirds of the West this weekend into early next week. Heavy snow and blizzard conditions are possible for portions of the northern Plains into the western Great Lakes early to mid-next week, and severe weather and heavy rain are possible early to mid-next week from the Mid-Mississippi and Ohio Valleys into the ArkLaTex and Lower Mississippi Valley.
