

Incident Management Situation Report
Friday, May 19, 2023 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (122 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires: **	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there are two fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Thirteen fire suppression crews, three incident management teams and twenty-five overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Ten Year Average	Total
Fires (2013 – 2022 as of today)	19,899
Acres (2013 – 2022 as of today)	892,542

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry and breezy southwest winds will create elevated fire weather conditions and moderate to high risk significant fire potential across the Northeast today. A cold front will move through the Great Lakes today with showers and thunderstorms bringing light to moderate rain today, and into the Northeast tomorrow bringing temporary relief. This cold front will also move through the southern Plains today and into the Southeast this weekend. Scattered to widespread thunderstorms, some severe, are forecast across the southern Plains today, with scattered thunderstorms across the Southeast this weekend including the Florida Peninsula. Above normal temperatures will continue across the West, with record highs possible in portions of the northern Intermountain West. Isolated to scattered thunderstorms are also forecast across the West, with the most widespread rainfall across portions of the Southwest and southern Rockies. Upper ridging will build over Alaska this weekend with temperatures rising to above normal over much of the Interior, but significant fire potential will remain very low to non-existent.
