

**Incident Management Situation Report
Wednesday, June 4, 2025 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (65 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:	9
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.
Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

One U.S. Forest Service contracted large airtanker and three overhead personnel have been assigned to large fires in Canada.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	21,676
Acres (2015 – 2024 as of today)	1,193,831

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Locally breezy north winds will continue in the Sacramento Valley with minimum relative humidity as low as 10%, while lighter winds but very dry conditions continue across the northern Great Basin. Temperatures will remain above normal in California while near normal temperatures return to the northern Intermountain West. Scattered showers and thunderstorms will develop from far southern Nevada through the Four Corners and into the southern High Plains, with isolated thunderstorms in the eastern Sierra. Isolated showers and thunderstorms are also expected across the northern Plains, while scattered showers and thunderstorms develop along a slow-moving cold front from East Texas into the Great Lakes. Dry conditions are expected to persist in the Northeast and Mid-Atlantic, while scattered showers and thunderstorms develop in the Southeast, with the most widespread storms in Florida. Cooler than normal conditions with scattered to widespread showers will continue across southern Alaska and spread into the Interior. Moderate trade winds are expected across Hawai'i along with drier conditions as showers are confined to windward areas.
