

Incident Management Situation Report
Thursday, May 15, 2025 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (79 fires)
New large incidents:	3
Large fires contained:	4
Uncontained large fires:	10
CIMTs committed:	2
Type 1 IMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Eastern Area (PL 3)**Fire Activity and Teams Assigned****Totals**

New fires:	15
New large incidents:	0
Uncontained large fires:	3
CIMTs committed:	1

Camp House, Two Harbors Region, Minnesota DNR. CIMT (EA Team 1). IMT is also managing the Jenkins Creek fire. Two miles northeast of Brimson, MN. Timber. Active fire behavior with wind-driven runs, group torching and short-range spotting. Numerous structures threatened. Evacuations, area and road closures in effect.

Jenkins Creek, Superior NF, USFS. Fifteen miles southeast of Aurora, MN. Brush, closed timber litter and timber. Active fire behavior with short-range spotting and isolated torching. Residences threatened. Evacuations, area and road closures in effect.

Munger Shaw, Cloquet Region, Minnesota DNR. Two miles east of Elora Lake, MN. Timber and grass. Active fire behavior with creeping and smoldering. Structures threatened. Evacuations in effect.

TOTAL FIRES:		854	206	113	112	22,777	1,125	25,187
TOTAL ACRES:		100,604	999	38,768	10,384	794,981	88,992	1,034,730

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	18,297
Acres (2015 – 2024 as of today)	1,018,897

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry conditions will continue in the Southwest with minimum relative humidity of 5-15% and poor overnight recovery of 20-35% on mid-slopes and ridges. Breezy west winds of 12-22 mph are expected in eastern Arizona and New Mexico, as well, creating areas of elevated conditions. Showers and thunderstorms will develop ahead of a cold front in the northern Plains to the Midwest. While the heaviest rain is expected to fall in the Dakotas, relief from the very dry conditions is expected in much of Minnesota. Farther west, scattered showers and thunderstorms will develop across the central and northern Rockies. Very hot temperatures up to 110°F will continue in southwest Texas along with minimum relative humidity in the single digits and teens. Weakening upper-level low pressure will continue to bring scattered showers to the Northeast, while drier conditions develop in the Southeast. Dry and breezy northeast winds will continue across much of Alaska today, with the strongest gusts expected in southwest Alaska. Breezy trade winds are expected across Hawai'i with generally dry conditions except for a few windward showers.
